

## From Idea to Global Product.

Exceptional product design and engineering, backed by the manufacturing capability to see it through.

80+

Years Combined Experience

10+

Years in Business

NZ · AU · USA

Markets Served

We work with inventors, startups, and established companies who need a partner to take their product idea all the way – from concept all the way to a product in market.

### OUR SERVICES

#### Industrial Design

Designed to look great and be made.

#### Engineering

Product engineering built for production.

#### Prototyping

Test before you commit to tooling.

#### Packaging

Packaging that protects and sells.

#### Compliance

Standards certification for NZ, AU, USA.

#### Manufacturing

Own supply chain in China and NZ.

#### IP Strategy

Patent searches, advice and filing.

#### In-Market Support

Ongoing support after your launch.

### WHY COMPANIES CHOOSE PRO-DEV

- ✓ **One partner. The full journey.**  
Design, engineering, prototyping, manufacturing and in-market support. One team, no handoffs.
- ✓ **Design built to be manufactured.**  
Every concept is engineered for the factory from day one. What gets designed can actually be made.
- ✓ **Own supply chain in China and NZ.**  
Over a decade of direct factory relationships. Not broker introductions – our own team on the ground.
- ✓ **IRD-Approved R&D Provider.**  
Eligible NZ clients may claim a 15% tax credit on qualifying R&D expenditure.
- ✓ **Your IP protected throughout.**  
100% of your IP, tooling, and files. Always. Supplier agreements enforceable in Chinese courts.
- ✓ **Compliance built in, not bolted on.**  
We identify requirements at the design stage – before tooling is cut, not after.

### HOW IT WORKS

01

#### Tell us your idea

A sketch, a napkin, or a half-built prototype. We start from wherever you are.

02

#### We design and engineer it

Sketches, prototypes and engineering – until the design is right.

03

#### We manufacture and deliver

Through our own supply chain in China and NZ, to your door.
